

in Schools

WWW.SEEKEDU.ORG

Seeking Education Empowers Knowledge (S.E.E.K) Foundation was created in 2012 to empower and increase opportunities for the youth to build products through STEM/STEAM and other educational programs Nationally and Internationally.

S.E.E.K improves the value of life for youth of diverse backgrounds by providing public services that promote self advocacy and strategic thinking skills.

S.E.E.K engages youth in volunteerism to find solutions to problems their own neighborhoods and surrounding communities face.

Who is Seeking Education Empowers Knowledge (S.E.E.K) Foundation?

We are an award recipient organization from Dwayne Wade's, Wade's World Foundation, multiple features on, Focus Atlanta CW69, Good Morning LA, CA Live, New York PIX11, WPLG Local 10 News, and more. Our mobile non-profit, 501c3 organization provides services in various communities. Exposing real life situations to our youth, encourages them to lead, assist, and conquer what it means to become a lifelong, productive, problem solver within any setting.

Not only do we believe in the philanthropy of giving back, we also react to needs as they arise, whether it is in our own community or in communities that cross our path.
